Term of registration:
June, 15th 2016
Address / registration: see above

The event is aiming at a comprehensive discussion about the values of the European community of states. A particular topic/dilemma shall be contemplated and discussed from various different points of view. To evoke new structuring of the participants' values and cognitions shall be the purpose of the discussion.

Of course, there's also a lot of spare time to do sports and to get to know each other!

To talk with one another is not easy – especially in Europe, where nearly each country has its own language!

What are we talking about? About ...

- matters concerning young people
- Europe as a community
- how we can create our future in this European community
- the problems we share in Europe
- our different points of view on these problems
- how we can solve these problems by agreements

What will we do?

In four workshops... we discuss, how to deal with interesting European issues, to get to know the different European cultural traditions, to get to know each other, to find new friends and to enjoy the time.

Choice of courses:

Participants select a workshop on site.

Prerequisites for participation:

Students must be interested in topics concerning the EU. They should have a good command of the English language.

Confirmation of acceptance:

Acceptance of participation will be notified to students **within June 30th, 2016.**

Please send your application/registration including all documents **within June, 15th, 2016.**
